should check with the Manager's authorised distributors as to which Classes are available for subscription. - Class A (Dist) – SGD (Decumulation) and Class A (Dist) – USD (Decumulation) are de-cumulating Classes where distributions may result in a substantial amount of the initial capital being returned to investors. This may, over time, cause the NAV of these Classes to drop such that the number of Units of the Classes falls below the minimum number as may be determined by the Manager, in which case Manager shall have the absolute discretion to terminate such Classes. - The Manager may, from time to time, decide to make distributions at such rate and frequency as it may decide in its absolute discretion. The Manager also reserves its right to adopt a different dividend distribution policy in respect of the de-cumulating Classes than the other Classes of the Sub-Fund.	the Prospectus for information on features of the product.
Investment Strategy	
- To achieve its objective, the Sub-Fund target to allocate approximately 50% of the Sub-Fund's NAV in the Maybank Asian Equity Fund ("MAEF") and approximately 50% of the Sub-Fund's NAV in the Maybank Asian Income Fund ("MAIF"). Notwithstanding the foregoing, the Sub-Fund may from time to time invest up to 70% of its NAV in either MAEF or MAIF if the Manager deems appropriate. - The remaining NAV of the Sub-Fund which are not invested into the MAEF and/or the MAIF may be invested in other assets which include (but are not limited) to the Maybank Money Market Fund ("MMM"), equities listed in the Asia (ex-Japan) markets, debt securities, fixed deposits placed with financial institutions and/or money market instruments.	Refer to "Investment focus and approach" and "Disclosures on certain investments" in Appendix 4 of the Prospectus for information on the investment strategy of the product.
Parties Involved	
WHO ARE YOU INVESTING WITH? - The Manager is Maybank Asset Management Singapore Pte. Ltd. - The Trustee is BNP Paribas Trust Services Singapore Limited. - The Custodian is BNP Paribas, acting through its Singapore Branch.	Refer to "The Manager", "The Trustee" and "Other Parties – The custodian" in the Prospectus for further information on the role and responsibilities of these entities and what happens if they become insolvent.
KEY RISKS	
WHAT ARE THE KEY RISKS OF THIS INVESTMENT? The value of the product and its dividends or coupons may rise or fall. These risk factors may cause you to lose some or all of your investment, and your principal may be at risk:	Refer to "Risks" of the Prospectus and "Specific risks" in Appendix 4 of the Prospectus for information on risks of the product.
Market and Credit Risks	
You are exposed to market risk. - The value of an investment will decrease due to changes in market factors.	
Liquidity Risks	
The Sub-Fund is not listed and you can redeem only on Dealing Days. - There is no secondary market for the Sub-Fund. All realisation requests should be	

submitted to authorised distributors of the Manager.	
You are exposed to liquidity risk of investments. - The ability of the Sub-Fund to honor realisation requests is subject to its holding of adequate liquid assets.	
Product-Specific Risks	
You are exposed to default risk. - Where the issuer of a fixed income security fails to make timely payments of interest and/or principal, this may cause the value of the Sub-Fund to be adversely affected. Furthermore, current deposits and fixed deposits that the Sub-Fund has placed with financial institutions are also exposed to credit or default risk. If the financial institutions become insolvent, the Sub-Fund may suffer capital losses with regards to the capital deposited and interest foregone, causing the performance of the Sub-Fund to be adversely affected. You are exposed to interest rate risk. - The investments of the Sub-Fund in fixed income securities are subject to interest rate risk. A fixed income security's value will generally increase in value when interest rates fall and decrease in value when interest rates rise. Such movements in interest rates may negatively affect a security's value or the Sub-Fund's NAV. You are exposed to risks relating to distributions. - Dividend/interest income of the Sub-Fund may be adversely affected by (amongst others) investee entities suffering unexpected losses and/or paying lower than expected dividends, and adverse currency exchange rate fluctuations. Distributions may also be made out of capital, which may amount to a reduction of part of your original investment. Payment of distributions (whether out of capital or otherwise) may have the effect of lowering the Sub-Fund's NAV. Other risks to your investment include currency risk, derivatives risk, inflation risk, early redemption risk, large redemption risk, company specific risk, country risk and counterparty risk.
